

zColo combines secure, neutral, carrier-class colocation facilities with highly reliable fiber networks to exceed the array of networking needs for a demanding customer base.

About Los Angeles:

Los Angeles is the gateway for the converging needs of international carriers, metro and national carriers, content providers, wireless providers, large enterprises and media and entertainment companies. zColo's facility allows for highly effective and scalable interconnection to key partners and customers to ensure networking needs are always met. Zayo's fiber based network also helps ensure that networking needs across the country are met in a highly efficient and cost effective manner.
